EDUCATION

University of Education, Township, Lahore

Bachelors of Science in Information Technology | CGPA: 3.12/4.00

SKILLS

Languages: JavaScript (ES6+), TypeScript, MongoDB, MySQL

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, React Native, Tailwind CSS

Version Control: Git · GitHub

EXPERIENCE

MERN STACK DEVELOPER | DEV WEEKENDS

Jun 2025 – Sep 2025

- Engineered performant full-stack applications using Next.js and TypeScript, leveraging Server-Side Rendering (SSR) to improve SEO rankings and initial load speeds.
- Developed secure RESTful APIs with Node.js and Express.js, handling complex CRUD operations and implementing optimized MongoDB schemas for data integrity.
- Built dynamic Single Page Applications (SPAs) with React.js and Tailwind CSS, ensuring 100% mobile responsiveness and cross-browser compatibility.

FULL STACK DEVELOPER | RUWWAAD TECHNOLOGIES

Jan 2025 – May 2025

- Engineered the official company website using React.js and Node.js, delivering a fully responsive platform that increased mobile user engagement.
- Optimized frontend performance and implemented server-side SEO strategies, achieving a Google Lighthouse score of 95+ and reducing page load time by 40%.
- Developed a reusable component system with Tailwind CSS, standardizing the brand identity and reducing development time for future UI updates.

PROJECTS

LMS – PERSONAL LEARNING SaaS APP

Oct 2025

- Engineered a high-performance AI-powered SaaS platform using Next.js (App Router) and Tailwind CSS, leveraging Server-Side Rendering (SSR) for SEO and speed.
- Integrated Vapi AI to create a real-time conversational voice agent, processing natural language inputs to drive a dynamic, interactive learning experience.
- Implemented Supabase to manage secure user authentication (OAuth) and a scalable PostgreSQL database, automating deployment pipelines via Vercel.

MULTIVENDOR SERVICE MARKETPLACE

Aug 2025

- Developed a complex MERN Stack e-commerce platform featuring multi-vendor architecture, allowing independent sellers to manage dynamic inventory and sales data.
- Implemented secure JWT Authentication and Role-Based Access Control (RBAC), protecting API endpoints and ensuring data isolation between Admin, Vendor, and User dashboards.
- Integrated Cloudinary API for optimized cloud-based media storage and built a fully responsive, mobile-first frontend using React.js and Tailwind CSS.

REAL ESTATE PROJECT

Jul 2025

- Implemented an advanced property search and filtering engine using React.js, utilizing complex state management to sort real-time data by multiple criteria.
- Designed a fully responsive, mobile-first interface with Tailwind CSS, developing a modular component library to ensure design consistency and code reusability.
